## EDUCATION

### University of Illinois Chicago

January 2023 – May 2025

*Bachelor of Science in Computer Science, Minor in Finance*

- **Relevant Coursework:** Database Systems, Data Science, Software Design, Object-Oriented Programming, Data Structures & Algorithms, Systems Programming, Machine Organization, Visual Analytics, Probability & Statistics

## TECHNICAL SKILLS

**Languages:** Python, SQL, JavaScript, TypeScript, Java, Go, C/C++, HTML, CSS, Bash

**Development:** React, Next.js, React Native, Expo, Node.js, REST APIs, Tailwind CSS

**Analytics:** MySQL, PostgreSQL, Jupyter, pandas, Firestore, GA4, PostHog, Excel, Power BI, Tableau

**Tools:** Git, GitHub, Atlassian Cloud, AWS, Google Cloud, Azure, Docker, Linux, VS Code, Android Studio

## EXPERIENCE

### Product & Software Engineer Intern

May 2025 – Present

*ChaChing Social*

*Chicago, IL*

- Delivered full-stack features across ChaChing's web (**Next.js/React**), backend (**Go/Firestore**), and mobile apps (**React Native/Expo**), supporting onboarding, user flows, and feature delivery.
- Launched the Creator Tech Week growth campaign by shipping the microsite and RSVP flow, responsive **HTML** emails, and a UTM/GA4 tracking plan, helping drive **+242%** MoM active user growth (511 to 1,759).
- Conducted user research, market analysis, and funnel analysis to identify onboarding blockers, informing feature improvements that increased conversion by **25%**.
- Built **KPI** reports and dashboards using GA4 and PostHog data to track performance for product decisions.

### Business Operations Lead

March 2021 – July 2024

*Joshi Goods*

*Chicago, IL*

- Managed a multi-channel e-commerce and local marketplace portfolio of **120+** products, processing over **2,400** orders and generating **\$500,000+** in lifetime revenue across Amazon, eBay, Shopify, and other platforms.
- Designed automation/RPA-style **Python** bots with requests, BeautifulSoup, and Selenium to monitor retail sites and identify discounted or in-demand products, reducing manual sourcing effort.
- Created custom **SQL** databases to manage customer orders and analyze sales data, increasing productivity by over **50%** by identifying bottlenecks and optimizing product selection and inventory workflows.
- Utilized cloud-based **AWS EC2** Windows RDP instances to run real-time data scraping and sourcing operations.

### Automation Engineer (Contract)

April 2022 – August 2023

*Glowie*

*Remote*

- Played a pivotal role in launching "Glowie.app," delivering automation and web solutions to over **100** customers.
- Constructed automation scripts using Bablosoft's BrowserAutomationStudio, enhancing clients' business operations through workflows such as IMAP bots and review request bots.

## PROJECTS

### Xolas AI Assistant | *Next.js, TypeScript, Tailwind, Supabase, VS Code, Git, GitHub*

July 2025 – August 2025

- Engineered a personalized AI phone/chat agent (xolas.pro) that handles inbound calls and automates booking.
- Delivered live-synced Google Calendar scheduling with manual override, drag-and-drop, and modal **CRUD**.
- Implemented a data pipeline from the AI agent to Supabase powering orders and the admin dashboard.

### Market Moods | *Python, Machine Learning, APIs, Jupyter, Git, GitHub*

October 2024 – December 2024

- Built a framework ingesting Reddit, news, and NASDAQ **APIs** to model how sentiment drives stock moves.
- Applied OpenAI **NLP** and **ML** models to score news, predict price movement, and surface signals in a web UI.

## EXTRACURRICULARS

### Community Volunteer | *Shree Hindu Swaminarayan Temple ISSO*

January 2015 – Present

- Actively volunteering at various health/food drives and awareness expos, energizing community wellness.

### BotaniCare - Indoor Plant Care System | *UIC Engineering Design Expo*

April 2024

- Presented "BotaniCare," a scalable \$60 Arduino-based system built to optimize plant health at the UIC Expo.
